

HEL-X: Flake

Dimension:	$\varnothing=18 - 22\text{mm}$, 1.0 +/- 0.4mm height
Active surface:	$> 3,250 \text{ m}^2/\text{m}^3$
Material:	HDPE-recycled, black
Density:	$0.55 - 0.70 \text{ kg}/\text{dm}^3$
Weight:	$170 \text{ +/- } 10 \text{ kg}/\text{m}^3$

Due to the manufacturing process deviations in length, diameter, and weight of the products may occur.
Same as deviations in the entire surface and protected surface.
Material density fluctuations between $0.94\text{-}0.96 \text{ kg} / \text{dm}^3$.
