

Next Generation ODO Meter!

We Know D.O.

In 2008, we released our first handheld optical dissolved oxygen instrument for sampling applications - the ProODO. This revolutionary platform went on to dominate the water quality sampling market until 2018 when a more accurate, advanced platform was released - the ProSolo. Let us show you why now is the time to **Go Solo!**

- More probe options - ODO/T and ODO/CT for the field, ProOBOD for the lab
- The ODO/T assembly is more accurate than ProODO cables and features a longer sensor cap warranty
- 20x the memory than the ProODO - 100,000 data sets!
- Rechargeable battery; no more C-size alkaline batteries
- Built-in USB port for quick data export
